

Version Control Comparison

Complete the table below by ticking the boxes which you consider to be relevant to the tool in question – if you do not know the answer you may leave it blank, or have a guess.

E.g. as we know git is a distributed system, while subversion is a centralised system which requires a server, from this we know git can work in either fashion, but subversion cannot:

	Server / Client	Distributed
Git	✓	✓
Subversion	✓	
Clearcase	✓	

You are not expected to know all the answers to these, you are free to share ideas and use any resources available for research.

✓ = supported

✗ = unsupported

⚠ = Partial support
